Art Unit: 1625

Claims 1-17 are pending in this application.

Claims 1, 4-14, 17, are drawn to non-elected invention.

Restriction Requirement

The election of group II, claims 2-3, 15-16, with traverse in the Paper filed 9/26/08 is hereby acknowledged. The traversal is on the basis that it would not be a serious burden to examine all the groups given the extensive computer databases and search engines available. This is not persuasive because availability of extensive computer databases and search engines is not the basis for restriction requirement, and for reasons set forth in the last Office action. The compounds have different structures, belong in different class and subclasses and the Examiner is required to search each class and subclass to determine patentability. This is deemed undue burden to search all the groups.

Therefore, the restriction is still deemed proper and made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 3 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims improperly depend from their independent claims. In claim 3, "1 α (OH) vitamin D3, " line 1, is not 3-epi vitamin D3, and therefore not within the scope of claim 2. Claim 16 fails to further limit the scope of 15. A therapeutic pharmaceutically acceptable composition of claim 15 must necessarily be suitable for topical or oral administration. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder et al., *Biochem. Pharmacol.* (1992), Vol. 43(9), pp. 1893-905.

Schroeder et al., disclose the marked compound in the attached abstract.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 2-3, 15-16 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-2, 14 of prior U.S. Patent No. 6,100,294. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1625

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2-3, 15-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-3 of U.S. Patent No. 6,479,538. Although the conflicting claims are not identical, they are not patentably distinct from each other because in US '538, the instantly claimed compounds and composition are claimed in packages with instruction for treating disorders arising from aberrant vitamin D3 activity.
